

GRC Risk Dashboard

Maple Financial Services — Simulated Portfolio Assessment

Executive Summary

This simulated dashboard consolidates enterprise risks into a management-oriented view of risk exposure, ownership, treatment, status, and residual risk. It demonstrates a practical GRC reporting workflow using a structured risk register and Excel dashboard.

Disclaimer: This is a fictional portfolio project. All organizations, risks, data, ratings, findings, and recommendations are created for demonstration purposes and do not represent a real organization or production risk assessment.

Dashboard Metrics

Metric	Value
Total risks	10
Critical risks	3
High risks	4
Medium risks	3
Open risks	5
In Progress	5

Key Risk Themes

- Identity and access risks require focused remediation, particularly unauthorized access and excessive privileges.
- Data exposure and ransomware represent material business-impact scenarios.
- Third-party risk requires consistent security evidence, ownership, and remediation tracking.
- Risk status and residual risk should be reviewed regularly by management.

Risk Treatment Approach

The portfolio uses a 1–5 likelihood and 1–5 impact model, with inherent risk calculated as likelihood × impact. The scoring method is a demonstration methodology created for the portfolio and is not presented as a requirement of a specific cybersecurity framework.

Management Reporting Workflow

1. Identify risks → 2. Assess likelihood and impact → 3. Prioritize → 4. Assign treatment and ownership → 5. Track remediation → 6. Report material exposure and progress.

Material Risk Register

ID	Risk	Rating	Status	Owner	Residual
R-001	Unauthorized access to employee accounts	Critical	Open	IAM Manager	12
R-002	Customer data exposure	Critical	In Progress	CISO	10
R-003	Ransomware disruption	Critical	In Progress	Security Operations	8
R-004	Third-party security incident	High	Open	GRC Manager	9
R-005	Delayed incident detection	High	In Progress	SOC Manager	8
R-006	Excessive user privileges	High	Open	IAM Manager	8
R-007	Incomplete asset inventory	High	Open	IT Manager	7
R-008	Delayed regulatory reporting	Medium	In Progress	Compliance Officer	5
R-009	Security awareness gaps	Medium	In Progress	HR / Security	5
R-010	Backup recovery failure	Medium	Open	Infrastructure Manager	6

Conclusion

The dashboard demonstrates how a GRC professional can turn a risk register into a concise management reporting product. The project emphasizes risk prioritization, accountability, treatment tracking, and executive communication.

Portfolio Skills Demonstrated: Risk identification, likelihood/impact assessment, risk prioritization, risk treatment, remediation tracking, Excel reporting, dashboard development, and executive communication.
